

U-PICK RULES

Due to the COVID-19 mitigation guidelines, the following rules apply:

- If you are sick or are currently exhibiting any of the possible symptoms of COVID-19, please come a different day.
- Please park in designated areas or where instructed to go.
- There will be no personal containers brought into the fields. When picking in the field, please use the pails with liners provided at our check-in station.
- Please stay on assigned rows (when applicable) while picking.
- Do not pick blueberries off the ground or touching the ground as they may be contaminated.
- Stay as a group with those you came with - children must stay with parents and be closely supervised at all times.
- Eating is prohibited in the u-pick area.
- No smoking on the premises.
- No brittle plastic or glass bottles are allowed in the u-pick area.
- No pets are allowed in the field.
- Restroom and hand washing facilities are available by the u-pick check-in area.
- When checking out, please leave your blueberries in our pails. After weighing them, you may either purchase boxes to take your blueberries home in or take them to your car to pour into your own containers. Please return used pails and strings to the designated area.
- Please follow the rule of social distancing 6 feet apart throughout the whole process: in the parking area, check-in station, picking field, toilet facilities, hand washing station and check-out area.

Please do your best to follow these rules so that we will be able to stay open during our whole season. By doing so, you will help the pick-your-own experience to continue to be a safe and fun time for the entire family.

These are for food safety purposes and are part of our Good Agricultural Practice.
